PROFESSIONAL PROFILE

Architect | Interior Architecture | Project Development

Registered Architect based between Turin and Milan, with experience across architecture, interior design, project coordination and facility management.

My experience ranges from concept design and technical development to construction supervision, project delivery, and the management of building maintenance, technical services and facility operations. I work closely with clients, property managers, consultants, contractors and suppliers to ensure quality, operational efficiency and the long-term performance of built assets.

I am particularly interested in environments where architecture, craftsmanship, technical excellence and operational management come together to create spaces with a strong and lasting identity.

Project	VC2_	Complete renovation of a private apartment in Turin involving layout reconfiguration, bespoke interior elements and comprehensive construction coordination.
Location	Turin, Italy	
Date of completion	2023	
Project Type	Private Residential Interior Complete Renovation	The project was developed from concept design through completion, with direct involvement in design development, technical documentation, material selection and on-site supervision. Particular attention was dedicated to improving functionality while preserving the architectural identity of the original building.
Project Metrics	140 sqm	
Role	Lead Architect	Custom joinery, decorative wall treatments and tailored lighting solutions were integrated to create a cohesive residential environment suited to contemporary living.
Scope	Architectural Design Space Planning Construction Documentation Construction Management Site Supervision Lighting Coordination Custom Joinery Design	

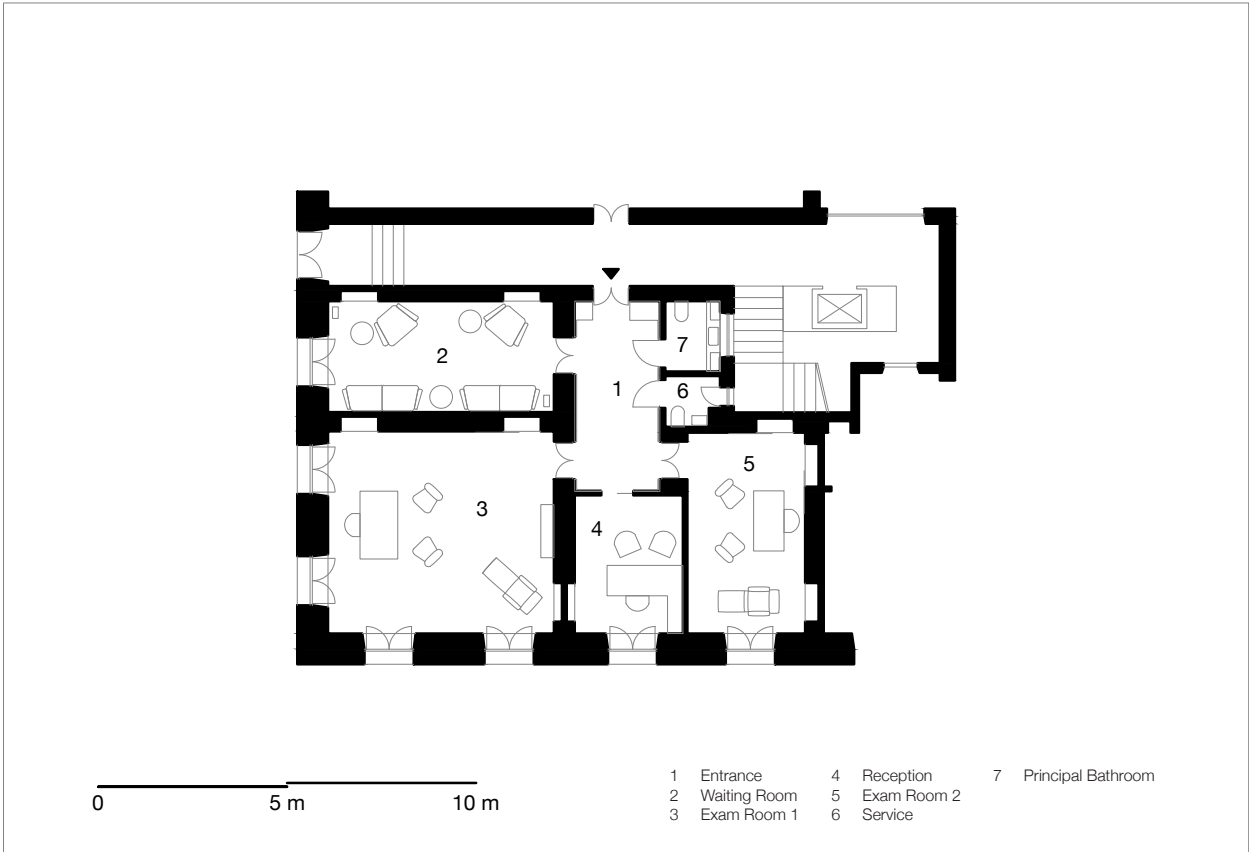

PREVIOUS PAGES | Living and dining area. ABOVE | Kitchen demolition and spatial reconfiguration. Custom wall panelling installation.
OPPOSITE | From demolition to completion: key stages of the renovation process.

Project	CRU30_	Conversion of a historic apartment in Turin into a specialist medical practice. The project combined healthcare requirements with the architectural character of the existing building through a complete renovation process including design development, technical documentation, contractor coordination and on-site supervision from concept to completion.
Location	Turin, Italy	
Date of completion	2022	
Project Type	Medical Practice Change of Use Complete Renovation	Independent project developed from concept design through construction completion.
Project Metrics	100 sqm	
Role	Lead Architect	
Scope	Architectural Design Space Planning Design Development Construction Documentation Material & Finishes Selection Custom Furniture Design Construction Coordination Site Supervision

Project	VDM4_	Renovation proposal developed for the bedroom of a historic apartment in Turin. The project focuses on preserving the character of the existing space while introducing a contemporary interior language through custom-designed furniture, carefully selected materials and curated furnishings.
Location	Turin, Italy	
Date of completion	In Progress	
Project Type	Custom Bedroom Interior	The intervention is based on a restrained design approach, where existing architectural elements provide the framework for new insertions. Particular attention was dedicated to proportion, natural light, material continuity and the relationship between historical surfaces and contemporary living requirements.
Project Metrics	90 sqm	
Intervention Area:	Primary Bedroom + En Suite Bathroom	
Role	Lead Architect & Interior Designer	The project includes interior design development, furniture integration, visualization production and material research.
Scope	Concept Design Material Research Custom Furniture Design Architectural Visualization Furniture Selection Interior Styling	

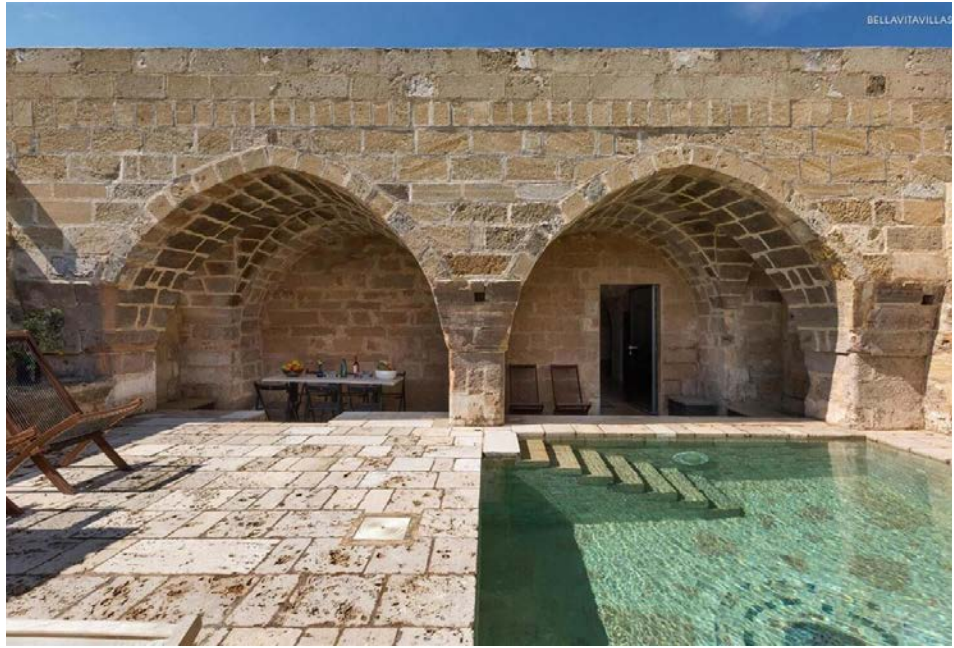

Project	CDS_SG	Hospitality and residential restoration project developed within Studio Genta Ternavasio at the historic Casino Doxi Stracca estate in Alezio, Southern Italy. The intervention involved the adaptive reuse of existing buildings into guest accommodations through interior design development, material research, visualization production and project support activities. My contribution focused on 3D modelling, rendering production, design assistance and documentation throughout different project phases.
Location	Alezio, Italy	
Date of completion	2020	
Project Type	Complete Renovation	
Role	Architectural Designer - Studio Genta Visualization & Project Support	Published on Architectural Digest Italia Online, May 2023.
Scope	Interior design support Architectural visualization 3D modelling and rendering Project assistance Material and finishes research Furniture and styling selection Site documentation	

Project	VMV2_SG	Luxury retail interior developed within Studio Genta. The project combined bespoke display systems, custom furniture and architectural interventions to create a distinctive retail environment. My contribution included design development, visualization production, material research, furniture detailing and project support during construction phases.
